COS 101 · LAB 1 ASSESSMENT

How to finish and submit your four lab exercises

You have four finished notebook files. You'll open each one in Google Colab, run it, save it as a PDF, and upload the four PDFs to your school portal. Follow the steps in order and tick each box as you go.

Name: Terkula Monica Doosuur **Matric No.:** 2026/A/CHS/0067

Time needed: about 30 minutes

Before you start, have these ready

- A laptop or desktop computer. A phone makes the PDF step very hard.
- Google Chrome and a working internet connection
- Your Gmail address and password
- Your MIVA portal username and password
- The four files your sibling sent you:

- `Exercise 1.3.1.ipynb`
- `Exercise 1.4.1.ipynb`
- `Exercise 1.5.1.ipynb`
- `Exercise 1.5.2.ipynb`

Yellow boxes in the pictures show exactly where to click.

A Save the four files

Put the files on your laptop.

☐ STEP A1

Open the WhatsApp chat or email where the four files were sent to you. Open WhatsApp Web (web.whatsapp.com) or your email on the laptop.

STEP A2

Click each file and download it. All four land in your **Downloads** folder.

STEP A3

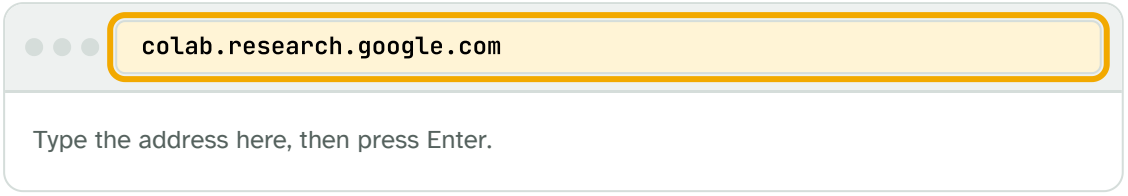

Do **not** double-click the files. Your laptop has no program to open them, and that's normal. Google Colab opens them in Part B.

B Open the first file in Google Colab

Start with Exercise 1.3.1.

STEP B1

Open Google Chrome. Type `colab.research.google.com` in the address bar at the top and press `Enter`.

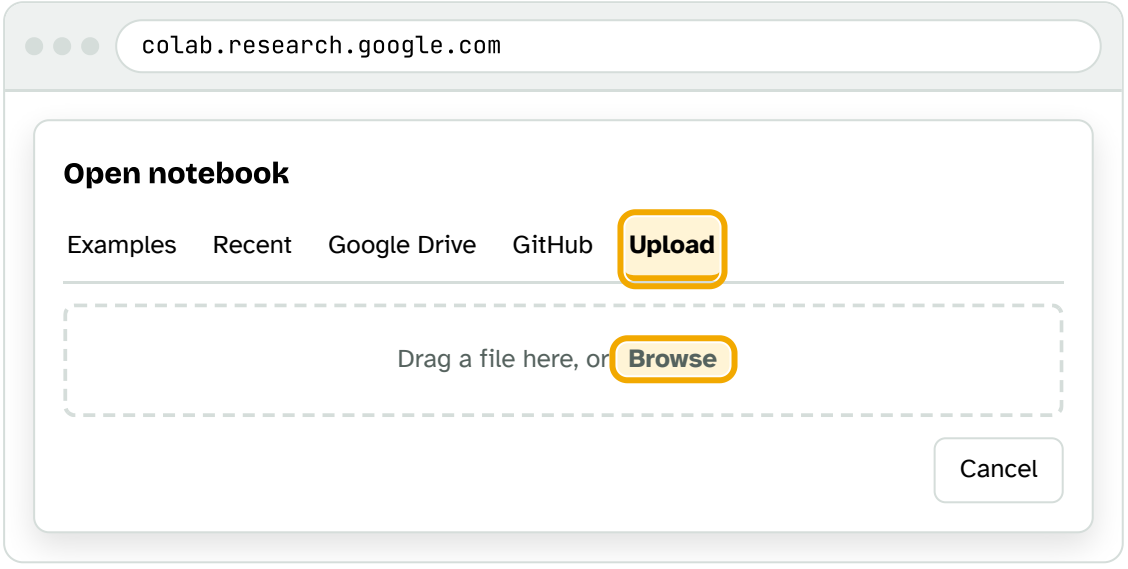

STEP B2

If you see a **Sign in** button at the top right, click it and sign in with your Gmail address and password.

STEP B3

A box called **Open notebook** appears. Click the **Upload** tab, then **Browse**. Open your Downloads folder and pick `Exercise 1.3.1.ipynb`.
No box? Click **File** at the top left, then **Upload notebook**.

☐ STEP B4

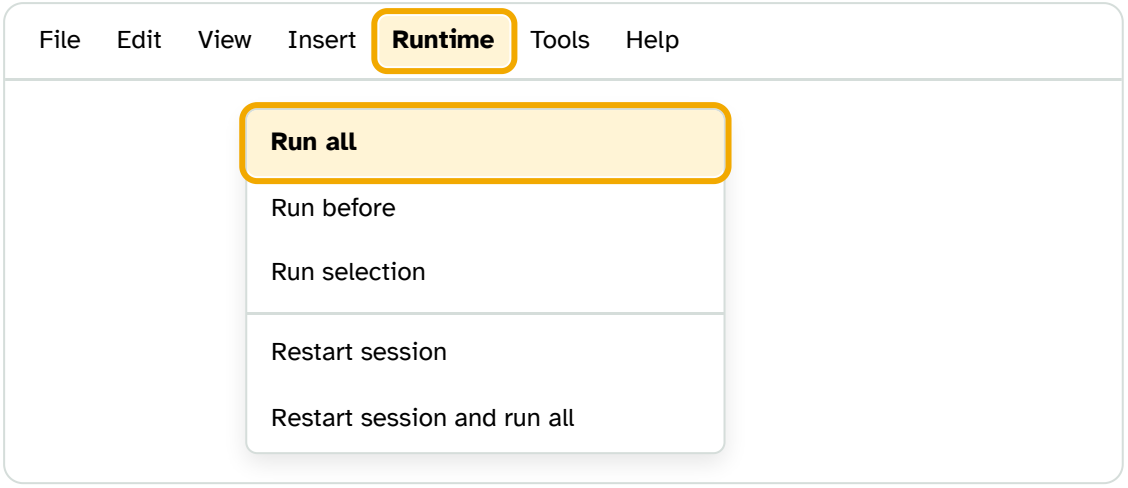

The notebook opens. Check the top: you should see your name, **Terkula Monica Doosuur**, and your matric number, **2026/A/CHS/0067**.

C Run the code

Running makes the answers appear under each grey box.

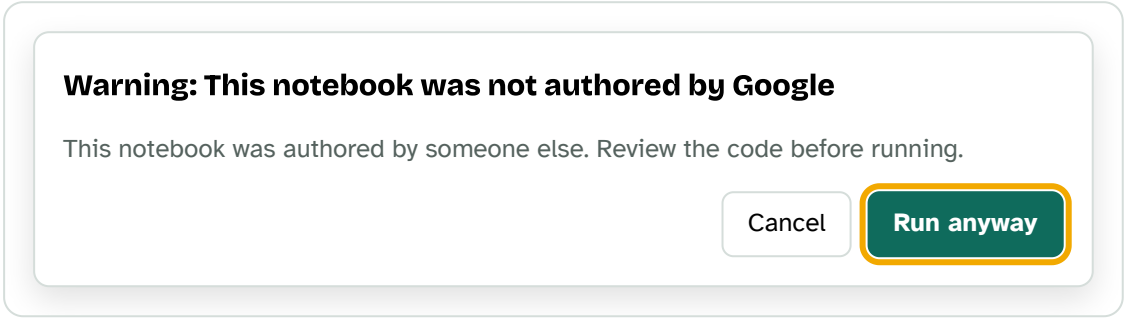

☐ STEP C1

In the menu at the top, click **Runtime**, then **Run all**. On the keyboard, `Ctrl` + `F9` does the same.

☐ STEP C2

A warning may say **"Warning: This notebook was not authored by Google."** This appears for every uploaded file. Click **Run anyway**.

☐ STEP C3

Wait 10 to 30 seconds. A green tick or the word **Connected** appears at the top right when Colab is ready.

STEP C4

Scroll down slowly. Under every grey code box, you should now see results in plain text. Example from Exercise 1.3.1:

```
### CG T1
name = "Terkula Monica Doosuur"
age = 19
...
```

```
name     : Terkula Monica Doosuur <class 'str'>
age      : 19 <class 'int'>
gender   : Female <class 'str'>
state    : Benue <class 'str'>
language : English and Tiv <class 'str'>
smile    : True <class 'bool'>
```

STEP C5

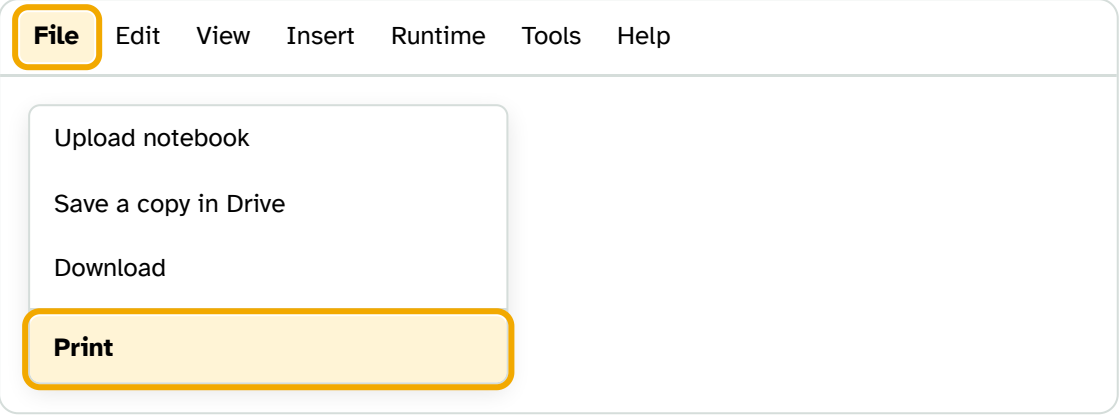

See red text anywhere? Click **Runtime**, then **Restart session and run all**, then **Yes**. Wait again.

D Save as PDF

The assignment asks for File, Print, Save as PDF.

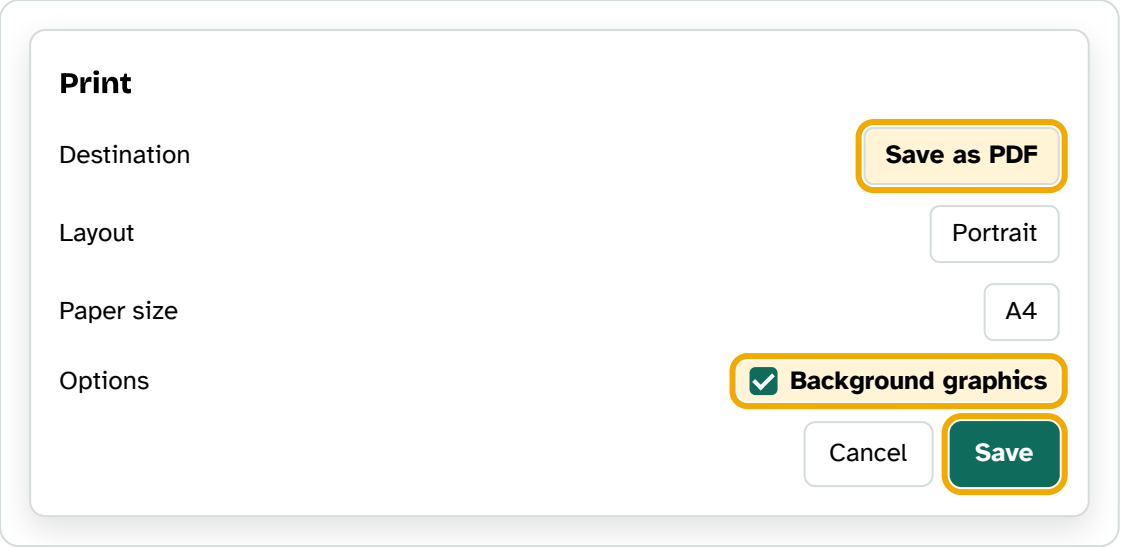

STEP D1

Click **File**, then **Print**. The keyboard shortcut is `Ctrl` + `P`.

STEP D2

In the print window: set **Destination** to **Save as PDF**. Click **More settings**. Set **Paper size** to A4, **Layout** to Portrait, and tick **Background graphics**. Then click **Save**.

STEP D3

A save box opens. In **File name**, type `Exercise 1.3.1`. Pick **Desktop** on the left as the place to save. Click **Save**.

STEP D4

Open the PDF from your Desktop and scroll through. Check three things: your name and matric number at the top, results under every code box, and no line cut off at the right edge.

E Do the other three files

Same steps, new file each time.

For each file below, click **File**, then **Upload notebook**, and repeat Parts C and D. Save each PDF with the name shown.

UPLOAD THIS	SAVE PDF AS	RESULTS YOU SHOULD SEE
`Exercise 1.4.1.ipynb`	Exercise 1.4.1	Interest owed: # 15000.0, then 212.0, 167.0 and 248.0 degrees Fahrenheit
`Exercise 1.5.1.ipynb`	Exercise 1.5.1	`[20, 18, 17, 16, 16, 15, 15, 14, 13, 12, 10, 10, 9]`

UPLOAD THIS	SAVE PDF AS	RESULTS YOU SHOULD SEE
`Exercise 1.5.2.ipynb`	Exercise 1.5.2	Number of keys: 10, Tanzania: 509 at the end, the word spinach, and grapes at the end of the fruits list

- [ ] STEP E1

  Exercise 1.4.1 done and saved as PDF

- [ ] STEP E2

  Exercise 1.5.1 done and saved as PDF

- [ ] STEP E3

  Exercise 1.5.2 done and saved as PDF. The slide says to name this one "1.5.1". That's a typo, so use **Exercise 1.5.2** to avoid two files with the same name.

- [ ] STEP E4

  Your Desktop now holds four PDFs: Exercise 1.3.1, Exercise 1.4.1, Exercise 1.5.1 and Exercise 1.5.2.

F Submit on your school portal

Button names differ a little between portals. Look for words close to these.

- [ ] STEP F1

  Sign in to your MIVA learning portal and open your **COS 101** course.

- [ ] STEP F2

  Find the **Lab Assessment** activity. Check under the week or module for Lab 1, or under Assignments.

STEP F3

Click **Add submission** or **Upload**. Drag the four PDFs from your Desktop into the upload box. If you see one box per exercise, put each PDF in its matching box.

STEP F4

Click **Save changes**, then **Submit assignment** if that button appears. Tick the box saying the work is yours, if asked, and confirm.

STEP F5

Check the status says **Submitted for grading**. Take a screenshot and keep it as proof.

Can't find where to submit? Ask your course facilitator, or ask classmates on the COS 101 forum where the Lab 1 assessment goes.

G Read what you submitted

Twenty minutes now saves you in the exam.

STEP G1

Open each notebook in Colab again. Read the lines starting with #. They explain what each piece of code does: variables, functions, lists and dictionaries. Your exam and later labs test these same four skills.

? If something goes wrong

Colab won't accept the file

Check the name ends in `.ipynb`. If WhatsApp added `.txt` to the end, rename the file and delete the `.txt`.

Nothing happens after Run all

Wait 30 seconds. Check the top right says Connected. Then click Runtime, then Run all again.

The PDF has blank areas or missing results

Go back to Colab, run everything again, wait until every box shows results, then print again.

You closed Colab by mistake

Upload the same file again and start from Part C. Nothing is lost.

Code lines are cut off in the PDF

In the print window, change Scale to 90 and save again.
